

I Need the Country

Lyric sheet

Verse I:

Where I come from the folks are blue collar
Rednecks all tryin to earn them a dollar
Doing what it takes to put the food on the table for love
I've been gone for 6 long years
Chasin down dreams, facing my fears
Speakin my peace each night to the man up above
These city lights got me thinking about who I once was

Chorus:

I need a dirt road with a truck full of friends
A cooler iced down Busch Light in my hand
I need a farm pond on a hand me down piece of land
I need a bonfire on the riverside
Watch the sun sink down on an elevator skyline
Count every last star on a full moon night
I'm a hell raisin backwoods homegrown junkie
I need the country

Verse II:

I grew up with a slow life down on Lincoln Street
Now it's traffic backed up bumper to bumper on blacktop heat
Everybody's in a hurry to get nowhere
Nobody waves or knows your name
It's just long blank stares
These city lights got me wishin I was back there

Chorus x2
